

TILE NIBBLER FOR GLAZED TILES AND MOSAIC

Professional tile nibbler specifically designed for extra hard tiles, porcelain tiles, mosaics and gres porcelain. This tool is extremely useful for making classic and artistic mosaics, small finishing touches for angles, special shapes, breaking tiles into small pieces.

Characteristics:

Made of high-quality forged steel, the tool has two tungsten carbide cutting wheels with titanium nitride coating. The highly effective lever combined with the concentrated points of contact between the material and the cutting edges guarantees extremely high cutting forces and accurate results. This means that the tool can also be used on vitreous mosaics and high finishing of cuts. The PVC-covered handle ensures a secure, comfortable grip.

Advantages:

The particular angle of the head means that the tool can be used for shearing the edges of tiles.
